skills-mcp-server — v0.1 Build

Agentic SDLC · 6 specialized roles · 21 tasks across 4 waves

8/21 done **0** in progress **13** backlog

Architect · Developer · SDET · QA · Reviewer / Security · DevOps

Wave 2 complete · 27/27 tests passing — config loader + local source + unit suites all land green through `.venv/`. Wave 3 (git source, registry, MCP app, integration + security tests) is queued.

BACKLOG 13

T09 WAVE 3
Git-source implementation (pinned refs, scheduled pull, .git/HEAD sentinel)
Developer

T10 WAVE 3
Skill registry — parse SKILL.md, build in-memory index
Developer

T11 WAVE 3
MCP app — expose skills as prompts + resources over stdio/HTTP
Developer

T12 WAVE 3
Integration tests for git source
SDET

T13 WAVE 3
Integration tests for registry (incl. broken-skill validation)
SDET

T14 WAVE 3
End-to-end MCP stdio test (client connects, lists prompts, reads resource)

IN PROGRESS 0

REVIEW 0

DONE 8

T01 WAVE 1
Scaffold Python package (pyproject.toml, src/ tree, stubs)
Developer

T02 WAVE 1
Test harness + sample-skill fixtures
SDET

T03 WAVE 1
Replace mocked CI with real ruff + pytest + docker pipeline
DevOps

T04 WAVE 1
Land Agentic SDLC role doc under docs/
Architect

T05 WAVE 2
Config loader — YAML parser, pydantic schema, env substitution
Developer

T06 WAVE 2
Source abstraction + local-source implementation
Developer

T07 WAVE 2

SDET

T15 WAVE 3

Security tests — symlink traversal, resource path restriction

SDET

T16 WAVE 4

Operator CLI — run / init / reload / selftest

Developer

T17 WAVE 4

Dockerfile (multi-arch, non-root, read-only rootfs compatible)

Developer

T18 WAVE 4

Wire real docker buildx + ghcr push into CI

DevOps

T19 WAVE 4

Conformance check against Anthropic public skills corpus

QA

T20 WAVE 4

Security audit — subprocess contract, symlink, UID escalations

Reviewer

T21 WAVE 4

Code review sweep across all merged PRs before v0.1 tag

Reviewer

Unit tests for config loader (14 tests)

SDET

T08 WAVE 2

Unit tests for local source (13 tests)

SDET
